ONE DAY FIELD TRIP

POULTRY FARM FIELD TRIP ,KAJA Nov -30TH 2021.

The Department of zoology conducted field visit on 30 November 2021 at kaja village as a part of curriculum in Vth semester. for III B.Sc(BZC).

OUTCOMES:

The one day field trip has given hands on experience to the students of Sri A.S.N.M.GOV'T (A) college to acquire knowledge on the types of poultry birds and various diseases. If the students are unable to continue their education in future , they may be able to become a successful entrepreneur by managing a poultry farm.

1. The students have learn different types of poultry birds and their significances in economic importance.
2. The students have learn different types of diseases and their preventive measures that should be taken to avoid the seasonal diseases.

FIELD TRIP REPORT

Direct experience about the management of poultry species and their production and exporting their products from one place to another place and knowing about the profit and loss per annum. The students asked their doubts regarding feeding management and vaccines and some of the other medications that should be given to the poultry species .The farmer of the poultry farm has explained all the things that are asked by the students and the students are enriched with the knowledge about the feeding mechanism and vaccination techniques at that time.

Around 19 members of the students has taken part in this field visit along with the incharge of zoology department Dr.M. Ramakrishna, lecturer in zoology, Sri A.S.N.M.GOV'T (A) College,palakol.

OBJECTIVE

The main objective is that the student may be able to get knowledge about the culture techniques, feeding managements, Identification of seasonal diseases by physical observation of the fish.

FIELD TRIP REPORT

The Department of Zoology organized a field trip to Aqua fish ponds to the final B.Sc (BZC) Students along with the 2 faculty members. We started our journey at afternoon session and reached to aqua ponds at Kaja, the students observed the way of pond construction and types of species culturing there.

Students asked the Aqua farmer about their doubts regarding the selection of species to be culturing and feeding techniques and timings, moulting process. Students are also expressed their doubts about preventive measures related viral and bacterial diseases.

OUTCOMES:

- ❖ The students enriched with the knowledge about the site selection and all facilities should be available to cultivate a fish and shrimp ponds.
- ❖ The students are known about the feeding techniques i.e about both the Natural and Artificial feeds.
- ❖ The students are known about the diseases like columnaris, fin and tail rot, vibriosis, dropsy etc.
- ❖ The students are known about the Preventive measures of the infected diseases.
